# INTRODUCTION

What is your chance for a position in teaching or educational administration? What subject fields or combinations of subjects are in most demand? For which level, elementary, secondary, or college grades, are requests for teachers most frequently made? From what part of the country or world are vacancies reported?

If you are an adviser of students, how may you answer such questions as those in the first paragraph which might be asked by your students?

The Office of Teacher Placement of the University of Illinois presents herewith data which may help you answer these questions. The data are based upon an analysis of the vacancies reported to the Office of Teacher Placement during the period September 1, 1951 to August 31, 1952.

Staff members of the Office of Teacher Placement will be pleased to discuss placement problems with you. The services of the staff are available without charge.

Office of Teacher Placement  
University of Illinois  
200 Gregory Hall  
Urbana  
Telephone: 7-6611, Ext. 137

Areas of primary responsibility of staff members (all attempt to keep informed in all areas, however):

Gordon F. Anderson - Secondary subjects, except agriculture and physical education for men, and all college subjects except elementary and special education.

Raymond E. Schultz - Elementary; secondary subjects of agriculture and physical education for men; special education; and college positions in elementary and special education.

J. Lloyd Trump - Educational Administration

Mary F. Mauk - Chief Clerk

EEP 1 '53 MARSHALL

200 Gregory Hall

g. Bee. Ec. and

Ch. 53

# SOME GENERALIZATIONS BASED UPON AN ANALYSIS OF THE VACANCIES REPORTED

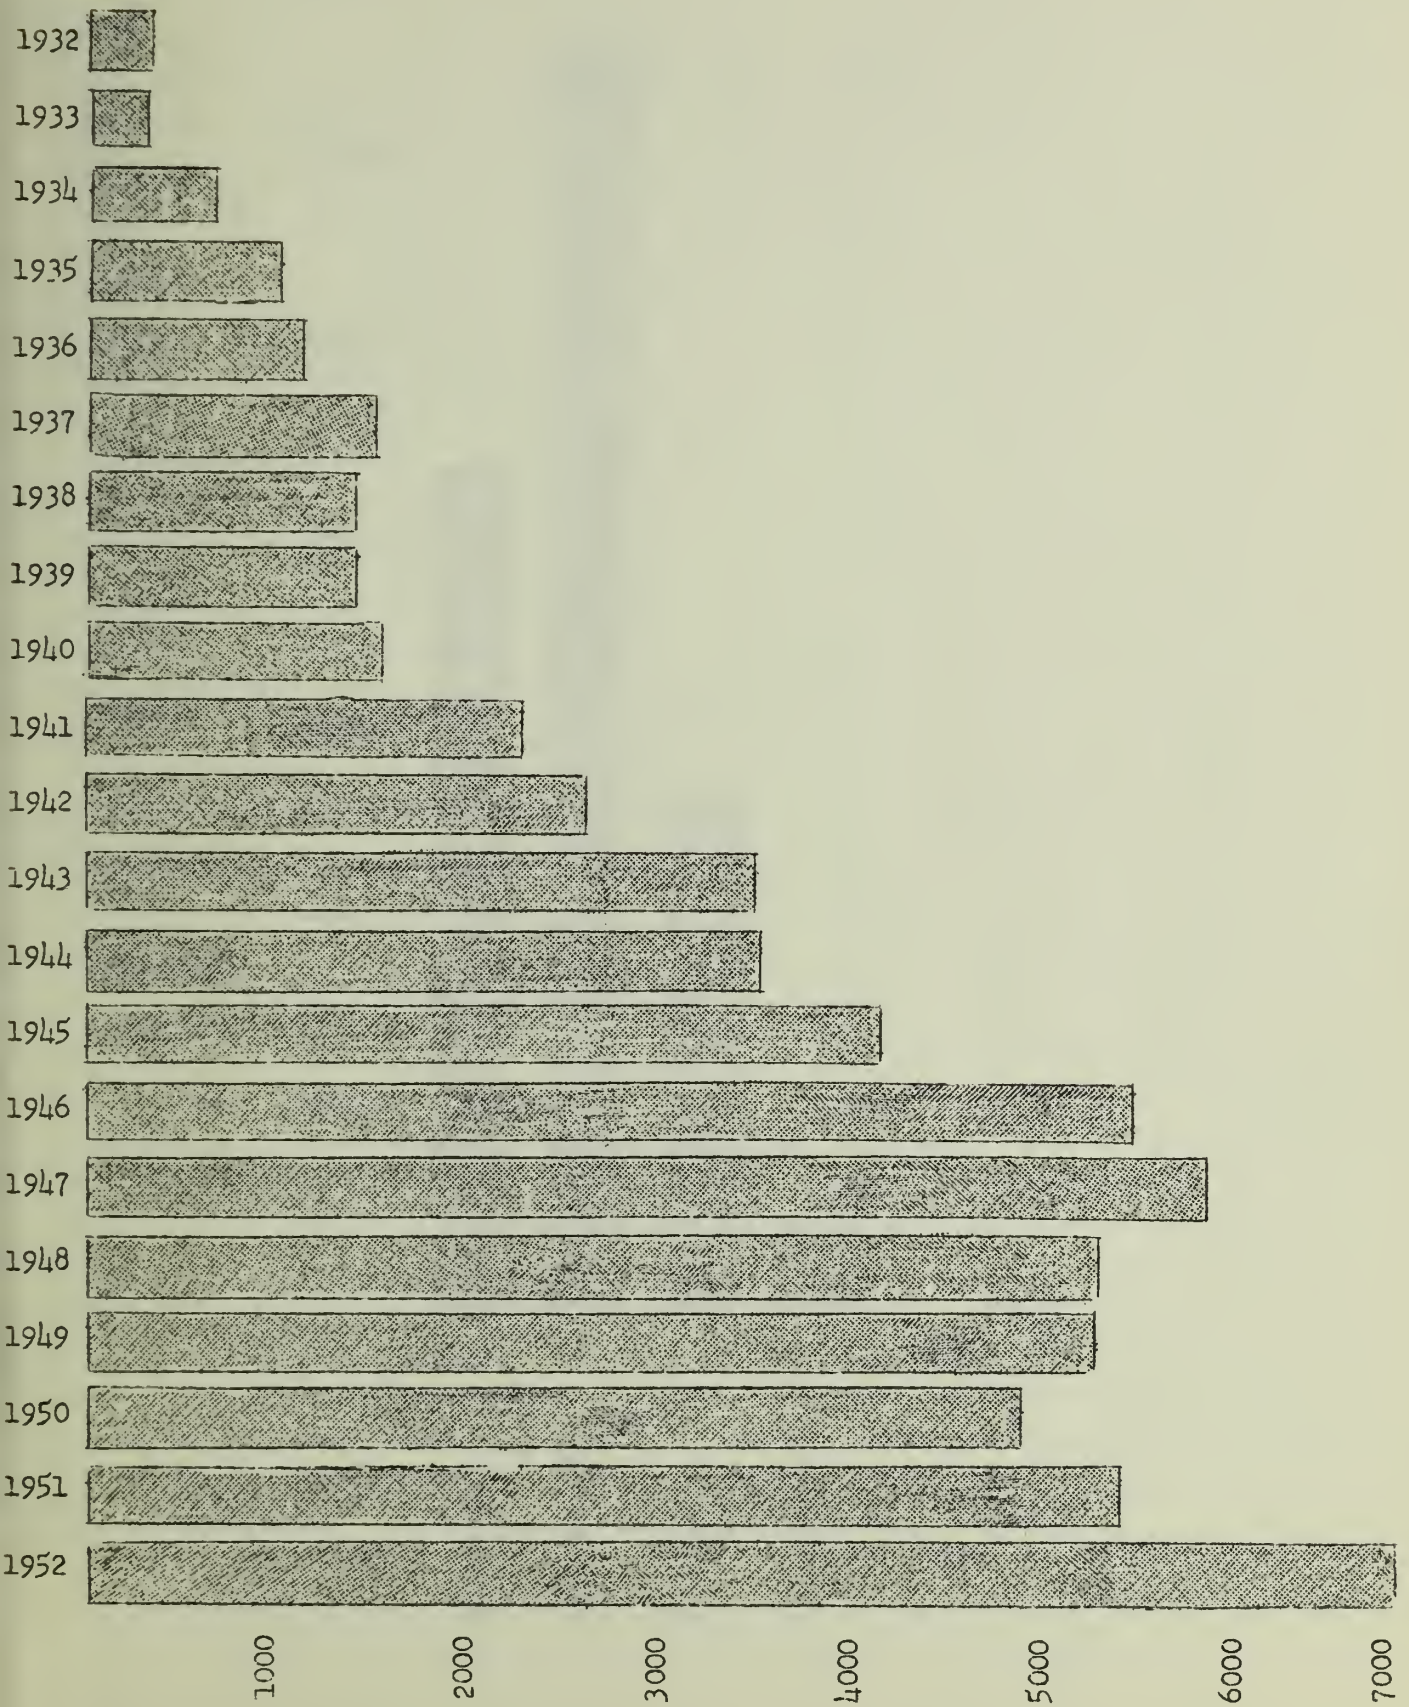

1. More vacancies were reported to the Office of Teacher Placement at the University of Illinois during the period, September 1, 1951 to August 31, 1952 than in any other similar period during the past 2 years (see Chart 1, page 4). As a matter of fact more vacancies were reported during the present year than in any similar period in the 40 years during which teacher placement has been an organized activity at the University of Illinois.
2. The Office receives vacancy reports for all grade levels (see Chart 2, page 5 and the table on page 6). The number of calls for secondary teachers received was about double that of the college calls; elementary teachers are in great demand.
3. Vacancies were reported from all 48 states, the District of Columbia, and many foreign countries. (see the table on page 7)
4. Very few high school teachers are asked to teach in more than two subject areas (see Chart 3, page 8 and the table on page 18). A considerable majority of the teachers are required to teach in only one area. The subject combinations listed in the vacancies are shown in the tables on pages 12 - 18 and 26.
5. The three most popular secondary subject areas in the vacancy reports were English, music, and home economics, in that order (see Chart 4, page 9).
6. More than one-half of the secondary school teaching vacancies reported to this Office were in Illinois (see Chart 5, page 10).
7. Almost two-thirds of all of the elementary school vacancies were for teachers of the primary grades (see Chart 6, page 11). The types of vacancies are shown in the tables on pages 12 and 26.
8. The three most frequently reported types of vacancies in college teaching positions were for teachers of education and psychology, science, and for critic teachers in teacher education programs (see Chart 7, page 9). The number of vacancies in different subject areas are shown in the tables on pages 21 - 24 and 27, and the locations of the vacancies are shown in Chart 8, page 20.
9. A considerable number of vacancies in foreign countries, especially in Europe and Asia, were reported (see Chart 9, page 25 and the tables on pages 26 and 27).
10. The vacancies in educational administration were nearly equally divided among superintendencies, high school, and elementary school principalships (see the table on page 28).
